

Gina Dickerson Senior Project Manager, Point Thomson ExxonMobil

- Discovered in 1977
- 60 miles east of Prudhoe Bay and TransAlaska Pipeline
- Point Thomson Unit covers ~150 square miles

- Located in remote and environmentally sensitive area
- Thomson Sand reservoir contains an estimated 8 trillion cubic feet (TCF) of gas and 200 million barrels of condensate (~25% of known North Slope gas resource)

Point Thomson Initial Production Facility

Scope

- Produce up to 10,000 BPD of condensate into TransAlaska Pipeline System
- Support pipeline extension, with a capacity of 70,000 BPD
- Establish critical infrastructure (roads, gravel pads, pier, camp, airstrip, gas processing plant)

Process

- Capacity to cycle 200 million cubic feet of natural gas per day
- One production well and two injection wells
- Directional drilling minimizes environmental footprint

Infrastructure Investment, October 2013
